

You can update your card by downloading the new Update software by going to the **Support>Firmware** link at [www.cobaltdigital.com](http://www.cobaltdigital.com). Download “Firmware Update Guide”, which provides simple instructions for downloading the latest firmware for your card onto your computer, and then uploading it to your card through DashBoard™.

**Software updates are field-installed without any need to remove the card from its frame.**

The table below lists released software versions and describes the corresponding functions additions, improvements and/or corrections.

Software Version (Date)	Description
Rev 1.4.6 (12/28/2018 – present)	<b>Improvements:</b> <ul style="list-style-type: none"> <li>Provides increased tolerance of upstream audio events (such as unlock and/or re-lock of an embedded audio group) without forcing the card to “re-setup” its audio path. This allows to the card to be more adept at passing audio without disruptions such as clicks or pops when subjected to minor, non-corrupted upstream audio events.</li> </ul>
Rev 1.3.13 (9/8/2017 – 12/28/2018)	<b>Improvements:</b> <ul style="list-style-type: none"> <li>Includes firmware for SNMP MIB file enhancements.</li> </ul>
Rev 1.3.9 (7/21/2017 – 9/8/2017)	<b>Additions:</b> <ul style="list-style-type: none"> <li>Adds SNMP support.</li> </ul>
Rev 1.1.12 (3/1/2017 – 7/21/2017)	<b>Improvements:</b> <ul style="list-style-type: none"> <li>Card now accepts film rate PsF and 25/29.97/30 PsF rates.</li> </ul>
Rev 1.1.2	<ul style="list-style-type: none"> <li>Initial release</li> </ul>
