

BBG-1123-ENC2 • Dual-Channel 3G/HD/SD MPEG-4 Standalone Encoder Units

The **BBG-1123-ENC2** provides a compact form-factor standalone unit for distribution of MPEG-4 encoding. Utilizing the openGear® open-architecture control/monitoring platform, the BBG-1123-ENC2 can be remotely controlled and monitored with the free, easy-to-use DashBoard™ setup and control operator interface. (When connected to your network, the BBG-1123-ENC2 appears in DashBoard just like any other device.) The BBG-1123-ENC2 includes dual redundant 10/100/1000 Mb/s Ethernet ports for control. Low-profile packaging fits 1 RU installations.

The BBG-1123-ENC2 offers the latest advances in video compression that delivers excellent video quality at very low bit rates. Unique encoding designs allow delivery of multiple HD and SD video services simultaneously. In addition to two ASI outputs, the BBG-1123-ENC2 provides two Ethernet outputs, supporting full-duplex 100 Mb/s and 1 Gb/s operation. Input video auto-detect mode allows encoding to automatically configure an output that correspond to the input, with resolution and frame rate same as input, and scaling set to same as input or other applicable choices.

When using the Ethernet output, the BBG-1123-ENC2 supports the traditional UDP/RTP/SPMTE 2022 FEC protocols, as well as the HTTP Live Streaming protocol for transmitting live video over the Internet. Using HTTP Live Streaming, the BBG-1123-ENC2 can transmit broadcast-quality video to mobile phones (Apple and Android 4.0 supported), tablets, and a variety of consumer set-top boxes (such as the Amino A140 and the Roku Player).

RTMP support allows direct publishing of real-time, live content to Adobe® Media Servers or any other servers, web sites and CDNs with RTMP ingress, such as Justin.tv, UStream, LiveStream and Akamai. Publish professional-quality real-time SD/HD content to Internet viewers (including some critical features not available in PC-based software encoders) such as ancillary data support (closed-captioning, AFD) and SD-SDI/HD-SDI video inputs with embedded audio support – all in broadcast-grade video quality. SMPTE-2038 processing allows inserting generic ancillary data packets in the transport stream, with frame accuracy. Up to four DID/SDID pairs can be supported. Full user remote monitor/control allows full device status and control access across a standard Ethernet network.

BBG-1123-ENC encoders are also available in single encoding channel configuration. For BBG-1123-ENC single-channel encoder models information, please see **BBG-1123-ENC Single-Channel 3G/HD/SD MPEG-4 Encoder Units** web page.

FEATURES

Compact self-contained form with built-in AC power supply. Up to 3 units can be installed in a 1RU tray.

Input video auto-detect mode automatically configures output to correspond to input frame rate and scaling

DVB-ASI and Ethernet outputs

Full support of CEA-608 and CEA-708 closed captioning and PMT information. Closed-captioning filtering allows filtering to allow and use only SMPTE-334M and/or CEA-708 closed captioning.

Optional RTP/ARQ support

License-based options allow tailoring functionality as needed, with upgrades available if later desired

Support for inserting generic ancillary data packets in the transport stream using SMPTE-2038, with frame accuracy. Up to four DID/SDID pairs can be supported.

Built-in video/audio ADC and embedder allows direct use with SD composite video and audio analog sources

Optional support for additional audio pairs per encoded output

Built-in Packet Test Generators allow pre-validation of transport

HTTP Live Streaming protocol allows viewing by Apple® and Android™ 3.0 (or higher) devices

SCTE 104 to SCTE 35 conversion

Multi-angle support allows creation of transport streams with two synchronized video PIDs

Multiple pre-defined control templates provide automatic setup of popular contribution-to-distribution schemes

Ethernet remote control/monitoring via free DashBoard™ software. Advanced front panel display/user interface allows initial and basic configuration setup without needing connection to external network or remote control.

RTMP support for publishing to Adobe® Media Server, availing SDI content to Internet viewers

Dual-redundant internal power supplies

Five year warranty

OPTIONS

Please see Ordering Information

BBG-1123-ENC2

BBG-1123-ENC2 • Dual-Channel 3G/HD/SD MPEG-4 Standalone Encoder Units

SPECIFICATIONS

Power

100-250 VAC, 47-63 Hz, 12W

3G/HD/SD-SDI Inputs

Number of inputs: 2, each configurable as:

3G-SDI (SMPTE 424M)

HD-SDI (SMPTE 292M)

SD-SDI (SMPTE 259M) with EDH

Composite analog video (PAL/NTSC)

Audio Inputs Supported

Embedded SDI, AC-3 (optional)

(2) L/R pairs (max) of analog audio embeds

Video Encoding

Dual-channel HD Video:

MPEG-4 AVC High profile at level 4.2 (HP@L4.2)

MPEG-4 AVC High profile at level 4.0 (HP@L4.0)

CBR & VBR

2Mbps to 30Mbps (configurable)

Dual-channel SD Video:

MPEG-4 AVC Main profile at level 3.0 (MP@L3.0)

CBR & VBR

1.5Mbps to 10 Mbps (configurable)

Audio Encoding

MPEG-1 layer II, up to 2 stereo pairs base (Dolby® pass-thru)

MPEG-4 AAC-LC up to 2 pairs

MPEG-2 (ADTS) & MPEG-4 (LATM/LAOS encapsulation)

Lip sync adjustment

Video Resolution Supported

HD: 1920 x 1080p 60/50/30/29.97/25

1080 x 1920/1440i 30/29.97/25

1280 x 720/960/640p 59.94/50/30/29.97/25

SD: 576 x 720/528i 29.97fps

576 x 720/528i 25fps

Video Pre-Processing

Advanced adaptive spatial filtering

Closed Captions CEA 608B & CEA-708C

WSS/AFD

Teletext (WST system B)

ASI Outputs

Number of outputs: 2, 75Ω BNC DVB-ASI

213Mbit/s maximum ASI TS bit-rate per port

Ethernet

Number of control/monitor connections: 2, redundant 10/100Base-T RJ-45

Number of transport outputs: 2, 100/1000Base-T RJ-45

ports, auto-negotiate or fixed speed

IPv4,IPv6 ,UDP & RTP

SMPTE 2022 ProMPEG FEC CoP3, 'Forward Error

Correction' (Row and Column)

Regulatory Compliance

CE: CE marked in accordance with 89/336/EEC, 72/23/EEC and 1999/5/EEC Directive

UL: UL approval

US FCC: Part 15

EMC: EN55022, EN55024, EN6100-3-2

Safety: IEC60950

RoHS: 2011/65/EU

WEEE: 2012/19/EU

Physical

Dimensions (WxDxH): 5.8 x 14 x 1.7 in (14.6 x 35.6 x 4.4 cm) (including component projection)

Operating Temperature/Humidity: 32°F to 122°F (0°C to 50°C); 5% to 95% non-condensing

BBG-1123-ENC UNBALANCED INPUT (-U) MODELS

BBG-1123-ENC BALANCED INPUT (-B) MODELS

BBG-1123-ENC2 • Dual-Channel 3G/HD/SD MPEG-4 Standalone Encoder Units

ORDERING INFORMATION

Note: All models are available with unbalanced (RCA) analog audio inputs or balanced 3-wire analog audio inputs. Use -U suffix on part number for unbalanced-input unit (example: "BBG-1123-ENC2-U"). Use -B suffix on part number for balanced-input unit (example: "BBG-1123-ENC2-B").

BBG-1123-ENC2 Dual-Channel 3G/HD/SD MPEG-4 Encoder Unit with H.264 SD

BBG-1123-ENC2-HD-I Dual-Channel 3G/HD/SD MPEG-4 Encoder Unit with H.264 SD/HD up to 1080i

BBG-1123-ENC2-HD-P Dual-Channel 3G/HD/SD MPEG-4 Encoder Unit with H.264 SD/HD up to 1080p

Options and Accessories:

Note: - Unless indicated as program channel or audio channel pair license, licenses below are **device-based** licenses and require **only one license per unit**.

- Options denoted as "+" are software-based options which can be fitted on new product at ordering or field-installed as a software upload upgrade. Options denoted as "-" are hardware-based options which are factory-installed upon ordering, or factory-installed by returning fielded product to Cobalt for option installation.

-D-SD-HD-I-SA Upgrade License; Upgrade (1) SD Channel to HD up to 1080i

-D-SD-HD-P-SA Upgrade License; Upgrade (1) SD Channel to HD up to 1080p

-D-HD-I-HD-P-SA Upgrade License; Upgrade (1) HD 1080i Channel to HD 1080p

+RIST/ARQ-ENC Automatic Repeat Request License, Error Correction Assigned For Live Video Over IP / Internet Based on the Reliable Internet Streaming Transport (RIST) Standard

+UP-AAC-SA AAC Audio License; Add (1) AAC-LC Stereo Channel

+2A-SA Additional Audio Pair License

+SMPTE2022 SMPTE 2022 FEC License

BBG-1100-TRAY 1 RU Rack Mount Tray (supports up to three BBG-1100 units)

— Audio Capacity (Base and with Audio Add Option Licenses +2A or +UP-AAC) —

Base - (2) standard MP1L2 encoding licenses on 2 PIDs.

Add PIDs:

- Can have 4 audio PIDs total (2 additional +2A licenses or 2 additional +UP-AAC licenses).
